School Signs

I am requesting to have the school signs moved farther west on Lester Drive to include the K-2 school. I have two children attending the K-2 school and I am concerned about their safety and the safety of other children. I have observed many vehicles traveling at a high rate of speed through that area. The crossing guards have too. Parents and children cross Lester Drive near the K-2 school where there isn't a crosswalk.

I have contacted Brandon Jones from the street department five times via text from September 2023 through November 2023 requesting to have the school signs moved, but nothing has been done. He mentioned in his text that he hadn't completed an official recommendation to the City as of November 13, 2023.

The K-2 school has been there for years as you all know. I don't understand why the school signs weren't moved west when the school was built. Why can't they be moved now? Is it a funding or manpower issue? I am looking out for the safety of the school children, their parents, and the crossing guards.

Thank you for your time and attention to this safety issue.

v/r,
